

VILLAGE OF SARANAC

NOTICE TO RESIDENTS

Cleaning and Televising of the Sanitary Sewer System

WORK DATES

January 29 through February 28

The Village of Saranac has obtained a Grant from the State of Michigan to investigate sections of the sanitary sewer system, by way of cleaning and televising sanitary sewer mains within the Village. The Village has contracted with **Corby Energy Services (CES)** to perform the work associated with this project.

The first step of the project is cleaning of the sanitary sewer mains. You will notice larger vehicles within the road ways. These vehicles are used in the cleaning and televising operations of this project. You may hear or see back pressure of air in your toilets and/or drains, which is not unusual. This is the result of material in the sewer main passing by your residential service line, which is connected to the Village sewer system.

During this process, we recommend the following:

- 1) In order to minimize the possibility of discharge from your toilets during the use of this hydraulically propelled equipment, we suggest that you **keep your toilet lids closed**, and;
- 2) To prevent sewer odor from coming into your home, we suggest that you **pour a cup or two of water into each basement floor drain**. Because water evaporates over time, this should be done regularly as a preventative measure.

We appreciate your assistance in making this project successful for the Village of Saranac and its residents.

If you have any questions or concerns
please contact the Village Office at 616-642-6324
