PUBLIC SERVICE ANNOUNCEMENT FOR SARANAC VILLAGE RESIDENTS

Please refrain from flushing disinfecting wipes down the toilet, even if the package says “flushable”!

You’ve probably been using more disposable wipes around the house lately as we all take extra precautions because of the COVID-19 virus.

But PLEASE stop flushing those wipes down the toilet. Wipes bind with fats, oils and grease and can wreak havoc on smaller wastewater treatment facilities, clog sewer systems and harm your home’s plumbing.

Wipes are NOT flushable – even if the packaging says so. They might go down the drain, but they do not break up like toilet paper.

In fact, this is true about the following forms of wipes as well:

- Baby wipes are not flushable**
- Paper towels are not flushable**
- Tissues are not flushable**
- Disinfecting wipes are not flushable**

**THE SOLUTION IS EASY!
THROW THEM IN A TRASH CAN!**
