

VILLAGE OF SARANAC NOTICE OF STREET WORK

JULY 20 thru 22

(weather permitting)

This notice is to inform Village residents of a Chip & Seal process to be used on Village streets. Streets scheduled for 2022 are as follows:

MILL STREET

**(from Fuller St to East Village Limits)
and**

CENTER STREET

(from Mill St to Main St)

The Chip & Seal process applies an asphalt sealer and granular material to the street which seals the old surface and minor cracks, and adds a thin layer of material to the street's surface. During this process, there will be periods of time when the streets will have loose material on their surface. Those utilizing the streets, especially on motorcycles or bicycles, will want to use caution. There will also be periods of time when the material will create more than normal amounts of dust.

We realize that this process may cause short term inconveniences. However, this will allow us to preserve our current streets and better manage our road infrastructure.

Tim Simmons, Director of Public Works
